BIOGRAPHY I am an Associate Professor at the Faculty of Electrical Engineering, Mathematics and Computer Science of the University of Twente, where I lead the cybersecurity team of the Semantics, Cybersecurity & Services group (SCS), and I am a member of the International Secure Systems Lab (iSecLab). Previously, I was a Postdoctoral Researcher in the Computer Science Department at UC Santa Barbara, and I obtained a Ph.D. *cum laude* in Computer Science and Engineering at Politecnico di Milano. During my Ph.D., I took part in two research exchanges, working as a visiting researcher at UCSB and at the School of IT of the University of Sydney. I also love Capture The Flag (CTF) competitions, and I am a member of the Shellphish hacking team.

RESEARCH INTERESTS My research focuses on aspects of computer security traditionally known as *systems security*. In particular, my main research interests lie in the security of the software that people use in their daily tasks, and revolve around analyzing such software for multiple security purposes, such as malware detection, identification of privacy disclosures, and vulnerability discovery. For example, I have worked on analysis and defense mechanisms against advanced threats such as the infamous ransomware families, on the detection of obfuscated privacy leaks in Android apps, and on the design of novel program analysis techniques to identify and patch vulnerabilities in embedded firmware. I strongly believe in open, collaborative science, where researchers can easily and quickly access previous research outcomes to reproduce and analyze results obtained by others.

POSITIONS & EDUCATION

Associate Professor Faculty of Electrical Engineering, Mathematics and Computer Science University of Twente, The Netherlands	<i>June 2023–Current</i>
Assistant Professor <i>Tenured since January 2022</i> Faculty of Electrical Engineering, Mathematics and Computer Science University of Twente, The Netherlands	<i>May 2020–May 2023</i>
Postdoctoral Researcher University of California, Santa Barbara, USA	<i>July 2018–Apr 2020</i>
Doctor in Philosophy (Ph.D.), Computer Science and Engineering Politecnico di Milano, Italy, <i>cum laude</i> Thesis: <i>Defending from Financially-Motivated Software Abuses</i>	<i>Nov 2014–Mar 2018</i>
Visiting Researcher University of Sydney, Australia	<i>Nov 2017–Jan 2018</i>
Research Consultant Trend Micro Inc., Italy	<i>Jan 2017–Mar 2017</i>
Visiting Researcher University of California, Santa Barbara, USA	<i>Mar 2016–Aug 2016</i>
Master Degree in Computer Science Engineering Politecnico di Milano, 110/110 <i>cum laude</i> Thesis: <i>Prometheus: A Web-based Platform for Analyzing Banking Trojans</i>	<i>Oct 2012–Oct 2014</i>
Bachelor Degree in Computer Science Engineering Università degli studi di Catania, 110/110 <i>cum laude</i>	<i>Oct 2009–July 2012</i>

FUNDING

P6: Prioritization for Prompt Patching of Programs with Pernicious Problems

Main PI: **Andrea Continella** (University of Twente)

Co-PIs: Erik van der Kouwe (Vrije Universiteit Amsterdam), Cristiano Giuffrida (Vrije Universiteit Amsterdam), Herbert Bos (Vrije Universiteit Amsterdam), Jeroen van der Ham (University of Twente), Giancarlo Guizzardi (University of Twente)

Funding: NWO Open Technology Programme, 812,322 EUR (6 years, expected starting April 2024)

Automated Patching for Embedded Firmware Images

PIs: **Andrea Continella** (University of Twente)

Funding: Ministry of Economic Affairs and Climate Policy (Dutch: Ministerie van Economische Zaken en Klimaat; EZK), 250,000 EUR (4 years starting March 2023)

Designing and Building an IoT Cyber Lab

PIs: **Andrea Continella** (University of Twente), Roland van Rijswijk-Deij (University of Twente)

Funding: “Impuls Financiering”, Faculty of Electrical Engineering, Mathematics and Computer Science, 200,000 EUR (3 years starting January 2022)

Children’s privacy and mobile health applications: an analysis of data sharing practices and impact

PIs: Lindsay Jibb (Hospital for Sick Children), Quinn Grundy (University of Toronto)

Co-PIs: **Andrea Continella** (University of Twente), Ralph Holz (University of Twente)

Funding: New Frontiers in Research Fund, Exploration Grant, \$248,753 CAD (3 years starting May 2020)

INVITED TALKS

- Keynote, Cyber Security Next Generation Workshop (CSng), Apeldoorn, Netherlands *Nov 2023*
- No Hat Security Conference, Bergamo, Italy *Oct 2023*
- University of Luxembourg, IRiSC Research Group, Luxembourg *Oct 2023*
- ONE Conference, The Hauge, Netherlands *Oct 2023*
- DIMVA'23 Panel, Hamburg, Germany *July 2023*
- Hack In The Box Security Conference, Amsterdam, Netherlands *April 2023*
- TU Wien, Security and Privacy Research Unit, Vienna, Austria *Mar 2023*
- Huawei Research Munich, AI4Sec Research Team, Online *July 2022*
- VUsec, Vrije Universiteit Amsterdam, Netherlands *April 2022*
- SI Seminar, Università della Svizzera italiana, Online *Mar 2022*
- No Hat Security Conference, Bergamo, Italy Online *Nov 2020*
- Black Hat Asia, Singapore Online *Oct 2020*
- Facebook, Inc., Menlo Park, CA, USA *June 2018*
- Pinterest Inc., San Francisco, CA, USA *May 2018*
- University of New South Wales (UNSW), Sydney, NSW, Australia *January 2018*
- Black Hat USA, Las Vegas, NV, USA *July 2017*
- Samsung Research America (SRA), Mountain View, CA, USA *June 2017*
- Microsoft Research, Mountain View, CA, USA *June 2017*
- Black Hat Webcast, Online *July 2016*
- INFOSEK 2015, Nova Gorica, Slovenia *Nov 2015*
- HackInBo, Bologna, Italy *May 2015*

TEACHING

University of Twente

- “Software Testing and Reversing” (MSc course) *2022 - Current*
- “System Security” (MSc course) *2021 - Current*
- “Empirical Security Analysis & Engineering” (MSc course) – with Ralph Holz *2021 - Current*
- “AI & Cybersecurity” (BSc course) *2020 - 2022*

Politecnico di Milano

- Teaching Assistant for the “Computer Security” course *2015 & 2017*
- Teaching Assistant for the “Elements of Computer Science” course *2015 & 2016*

SUPERVISING

PhD candidates

- Thijs van Ede – ML-based Intrusion Detection *Graduated cum laude, Nov 2023*
- Asbat El Khairi – Container & Cloud Security *Starting date: Feb 2021*
- Chakshu Gupta – IoT Security *Starting date: Oct 2021*
- Jerre Starink – Malware Analysis & Reversing *Starting date: Nov 2021*
- Zsolt Kucsvàn – Threat Detection & Response *Starting date: Nov 2021*
- Jacco Brandt – Malware Analysis & Detection *Starting date: Feb 2023*
- Jorik van Nielen – Automated Vulnerability Research *Starting date: July 2023*
- Matteo Grella – Cloud Security *Starting date: Sept 2023*

Master students supervised at the University of Twente

- N. Khasuntsev – *Automatic Detection of Misconfigurations of AWS Identity and Access [...]* *2021*
- T. Leemreize – *Analyzing fileless malware for the .NET Framework through CLR profiling* *2021*
- C. Scholten – *Automatic detection of zero-day attacks in high-interaction IoT honeypots [...]* *2021*
- C. Gupta – *HoneyKube: Designing a honeypot using microservices-based architecture* *2021*
- J. Starink – *Analysis and automated detection of host-based code injection techniques [...]* *2021*

SUPERVISING
(CONTINUED)

Master students supervised at the University of Twente

- C. Raghuraman – Detecting anomalies in programmable logic controllers through [...] 2021
- D. Melotti – Reversing and Fuzzing the Google Titan M Chip 2021
 - Winner of the Best Cybersecurity Thesis Clusit Award (Italian: Premio Tesi Clusit)
- L. Morgese – Stepping out of the MUD: Contextual network threat information for IoT [...] 2021
- L. Hafkemeyer – Non-invasive Characterization of Out-Of-Bounds Write Vulnerabilities 2022
 - Awarded as the 2022 Best Graduate of the EEMCS Faculty at TU Delft
- U. Nisslmueller – LOLBin detection through unsupervised learning 2022
- M. Liberato – SecBERT : Analyzing reports using BERT-like models 2022
- M. de Redelijkheid – Monitoring network traffic and responding to malicious traffic [...] 2023
- J. van Nielen – Dynamic Detection and Classification of Persistence Techniques in Malware 2023
- M. Macarie – Fuzzing Android Automotive’s CAN interface 2023
- C. Xu – Automatically Generating User-specific Recovery Procedures after Malware Infections 2023
- W. van Beijnum – Haly: Automated evaluation of hardening techniques in Android & iOS apps 2023

Master students co-supervised at Politecnico di Milano

- G. Bucci – RansomScan : extracting intelligence from ransomware families 2018
- G. Viglianisi – SysTaint : assisting reversing of malicious network communications 2018
- G. Mazzotta – Toward live memory forensics for malware identification 2018
- F. Salvioni – CrAVe : a comprehensive black-box approach to analyze antiviruses’ emulators 2017
- A. Guagnelli & G. Zingaro – RADAR: A Ransomware Detection And Remediation System 2016
- S. Rodi – Apollo: Eliciting and Analyzing Advanced Web-Inject based Malware 2016

AWARDS &
CERTIFICATES

- Dutch Cyber Security Best Research Paper Award - Runner-up May 2023
- University Teaching Qualification (UTQ) – “Basis Kwalificatie Onderwijs, BKO” Sept 2022
- ESAE awarded the best MSc course in Computer Science Q1 by UTwente students Nov 2021
- Google Cloud Research Credits Award (\$5,000) June 2020
- CyCon Best Student Thesis Award at “International Conference on Cyber Conflict 2015” May 2015
- Best M.Sc. Thesis Nominee at “Premio tesi ClusIT”, 2nd place Mar 2015
